

AIMP is a free audio player with support for large number of formats and playlists. It works with multiple playlists immediately, allows creation of bookmarks and also has a playback queue.

What's new in AIMP v4.11 build 1841

Change Log:

- Fixed: Playlist - the "add entire folder if one file is sent" option does not work correctly in some cases (regression)
- Fixed: Playlist - no ability to select few collapsed groups via keyboard
- Fixed: music library - table - album thumbnails view - playback that invoked via mouse double click always started from the first track in group
- Fixed: Music Library - small bugs were fixed
- Fixed: Plugins - API - an error occurs when calculating the hash code for certain images (regression)

Full list of changes you can find [here](#) .

What's new in AIMP v4.00 in comparison with v3.60?
